PROFILE

Frontend Developer with hands-on experience building responsive web applications using React.js, Next.js, Node.js, and TypeScript. Proven ability to craft clean, reusable, component-based UI architectures that deliver intuitive user experiences. Skilled in RESTful API integration, state management with Redux Toolkit and Context API, and modern styling with Tailwind CSS and Ant Design. Passionate about writing maintainable code and delivering high-quality digital products through real-world projects and collaborative teamwork.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern — React & Next.js

Dec 2025 – Feb 2026

Ali Square, Islamabad

- Developed fully responsive web pages using React.js, Next.js, Node.js, JavaScript, HTML & CSS, ensuring cross-browser compatibility.
- Built and maintained reusable UI components with Bootstrap and Ant Design, improving consistency and reducing redundant code.
- Integrated RESTful APIs and implemented routing using React Router & Next.js App Router for seamless navigation.
- Collaborated via Git & GitHub with pull requests, code reviews, and branching strategies in an agile team workflow.
- Designed and shipped 8+ production-grade web applications using React.js, Next.js, Redux Toolkit, Context API and REST API integrations.
- Applied mobile-first responsive design principles using Ant Design, Tailwind CSS, and Bootstrap across all projects.

PROJECTS

Easy Homes — Real Estate Listing Platform

A full-featured real estate platform where users can browse, search, and filter properties by location, price, and type. Integrated external REST APIs for live property listings and built dynamic Ant Design filter components, delivering a fast and responsive discovery experience across all screen sizes. The platform supports advanced filtering by neighborhood, budget range, and property category, with each listing displaying detailed information including photos, price history, and contact options for agents.

Tech Stack: Next.js · React.js · Tailwind CSS · Ant Design · REST API

News App — Live News Feed

A live news aggregator that fetches real-time articles via the public News API with category filtering and keyword search functionality. React Router handles smooth multi-page navigation between topics such as technology, sports, business, and health. Bootstrap delivers a clean, responsive card layout that works consistently across all devices. Users can bookmark articles and switch between dark and light reading modes for a comfortable browsing experience.

Tech Stack: React.js · REST API · Bootstrap · React Router

TextUtils — Text Transformation Tool

A browser-based text processing utility offering real-time case conversion (uppercase, lowercase, title case), word and character counting, extra whitespace removal, and copy-to-clipboard functionality. Built with a clean, distraction-free React interface designed for fast everyday text editing workflows. Additional features include text reversal, sentence count, and an estimated reading time calculator to help users quickly analyze any block of text without leaving the browser.

Tech Stack: React.js · Bootstrap

SKILLS

• Frontend & Backend Development

React.js, Next.js, Node.js, JavaScript (ES6+), TypeScript, HTML5 & CSS3

• Frameworks & Styling

Tailwind CSS, Ant Design, Bootstrap, CSS3

• State Management

Redux Toolkit, Context API

• Core Concepts

React Hooks, Component Architecture, Responsive Design, Clean Code

• API Integration

REST API, Fetch API

• Tools & Platforms

Git, GitHub, VS Code, npm

• Database / ORM

MySQL, MongoDB, Prisma ORM

EDUCATION

Bachelor of Science — Computer Science (BSCS)

2021 – 2025

Cholistan University of Veterinary & Animal Sciences (CUVAS), Bahawalpur

Final Year Project (FYP)

- **CUVAS Admission System** — A comprehensive student admission management platform for CUVAS university, handling applicant registration, form submissions, and status tracking end-to-end. Built on the Laravel MVC framework with a MySQL relational database and a role-based admin dashboard for staff management.

Tech Stack: JavaScript · PHP · Laravel · MySQL
